Job Opening: Data Quality Facilitator

Company: Atlantic Management Center, Inc. (AMCI)
Location: Columbus, Ohio
Position Type: Full-time, Exempt
Sector: Public Healthcare Business
Salary: Competitive; please include your salary expectations in your application.

Role Overview:

AMCI is actively seeking a proficient Data Quality Facilitator to enhance the data management practices within the State of Ohio Immunization Registry (ImpactSIIS), working closely with the Ohio Department of Health (ODH) and other key stakeholders. This pivotal role is based in Columbus, Ohio, and involves significant collaboration and project coordination to ensure the integrity and accuracy of public health data.

Key Responsibilities:

- **Data Quality Management:** Engage in the American Immunization Registry Association's (AIRA) Measurement and Improvement (M&I) Initiative, including participation in assessment and validation activities. Identify and address key data quality issues, prioritizing them for action.

- **HL7 Interface Implementation:** Support the development and monitoring of new HL7 interfaces to enhance the accuracy and efficiency of reporting. Implement innovative processes for effective monitoring and seamless reporting.

- **Reporting and Improvement:** Collaborate with IIS staff to develop periodic report cards based on CDC Core Data Elements, highlighting critical areas for data quality enhancement. Share insights and improvements with data senders to foster continuous improvement.

- **Stakeholder Collaboration:** Partner with state agencies, healthcare facilities, and other relevant groups to advance the utilization of the ImpactSIIS web application. Act as a key liaison for vendor and partner relationships, driving enhancements in data systems.

- **Project Coordination:** Lead training sessions, manage project projections, and monitor engagement levels within ImpactSIIS. Offer expertise in EMR-related aspects to support system users effectively.

Qualifications:

- Bachelor's degree in a related field.
- A minimum of three years of experience in the public health sector, particularly in data management.
- In-depth knowledge of immunization tracking and vaccines.
- Proficiency in EHR interfacing, with a strong preference for candidates with HL7 experience.
- Skills in SQL database querying, report generation, and data analysis.
- Demonstrated expertise in managing data infrastructure, quality control, and workflow optimization.
- Exceptional organizational and project management capabilities.
- Excellent communication skills and a proven ability to conduct effective training sessions.

Why Join AMCI?

Join a team that is committed to innovative software solution development that significantly impacts public health. AMCI offers a supportive and inclusive workplace, encourages professional growth, and values creativity and teamwork. Our comprehensive benefits package includes:

- Competitive salary
- Paid vacation
- 401(k) with company match
- Comprehensive health coverage (medical, dental, and vision)

How to Apply:

Motivated candidates with a passion for technology and a dedication to quality in healthcare data management are encouraged to apply. Please send your resume and a detailed cover letter explaining why you are the ideal candidate for this role to Linda Tate at ltate@amciweb.com.

AMCI is proud to be an Equal Opportunity Employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.

Join AMCI and contribute to groundbreaking public health initiatives that make a difference in communities across Ohio!
